

Active Recombinant Human/Mouse TGFB3 Protein

Cat. No. TGFB3-246H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human/Mouse TGFB3 Protein without tag was expressed in E. coli.
Species	Human/Mouse
Source	E.coli
Description	Transforming growth factors (TGFs) are multifunctional peptides that regulate growth and differentiation in most cell types. The TGF- β family of proteins signal through serine/threonine kinase receptors. TGF- β isoforms (TGF- β 1, - β 2, and - β 3) have overlapping, yet distinct biological actions in developing and adult tissues. TGF- β 3 is an important factor in regulating cell adhesion and accelerating wound repair. TGF- β 3 also functions during osteoblast proliferation, chemotaxis, and collagen synthesis.
