

Active Recombinant Bovine TNF Protein

Cat. No. TNF-716B Lot. No. (See product label)

SPECIFICATION

Product Overview Recombinant Bovine TNF Protein is produced by E.coli expression system.

Species Bovine

Source E.coli

ProteinLength 78-234 aa

Description TNF-alpha, also known as tumor necrosis factor, is the prototypic ligand of the TNF superfamily. It is a pleiotropic molecule that plays a central role in inflammation, apoptosis, and immune system development. This protein is produced by a wide variety of immune and epithelial cell types. It is assembled intracellularly to form a noncovalently linked homotrimer which is expressed on the cell surface. Cell surface TNF can induce the lysis of neighboring tumor cells and virus infected cells, and it can generate its own downstream cell signaling following ligation by soluble TNFR I. It also promotes inflammatory responses by inducing the activation of vascular endothelial cells and macrophages. Recombinant Bovine TNF-alpha was expressed in E.coli and purified by using conventional chromatography techniques.

Form Liquid. In Phosphate buffer saline(pH 7.4) containing 10 % glycerol.

Bio-activity Measured in a cytotoxicity assay using L929 mouse fibrosarcoma cells in the presence of the metabolic inhibitor actinomycin D. The ED50 for this effect is less or equal to 15 ng/ml.
