

Recombinant Human TSPO Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. TSPO-6213H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	TSPO MS Standard C13 and N15-labeled recombinant protein (NP_000705) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	Present mainly in the mitochondrial compartment of peripheral tissues, the protein encoded by this gene interacts with some benzodiazepines and has different affinities than its endogenous counterpart. The protein is a key factor in the flow of cholesterol into mitochondria to permit the initiation of steroid hormone synthesis. Alternatively spliced transcript variants have been reported; one of the variants lacks an internal exon and is considered non-coding, and the other variants encode the same protein.
