

## Recombinant Mouse Tnf protein

Cat. No. Tnf-484M Lot. No. (See product label)

### SPECIFICATION

<b>Product Overview</b>	Recombinant Mouse Tnf protein was expressed in Escherichia coli.
<b>Species</b>	Mouse
<b>Source</b>	E.coli
<b>ProteinLength</b>	157
<b>Description</b>	<p>Tumor necrosis factor alpha (TNF-<math>\alpha</math>), also called cachectin, is the best-know member of the TNF-family, which can cause cell death. This protein is produced by neutrophils, activated lymphocytes, macrophages, NK cells, LAK cells, astrocytes endothelial cells, smooth muscle cells and some transformed cells. TNF-<math>\alpha</math> occurs as a secreted, soluble form and as a membrane-anchored form, both of which are biologically active. The naturally-occurring form of TNF-<math>\alpha</math> is glycosylated, but non-glycosylated recombinant TNF-<math>\alpha</math> has comparable biological activity. The biologically active native form of TNF-<math>\alpha</math> is reportedly a trimer. Human and murine TNF-<math>\alpha</math> show approximately 79 % homology at the amino acid level and cross-reactivity between the two species. Two types of receptors for TNF-<math>\alpha</math> have been described and virtually all cell types studied show the presence of one or both of these receptor types.</p>
<b>Form</b>	Lyophilized from a 0.2 $\mu$ m filtered solution in PBS, pH 7.2.
<b>Bio-activity</b>	Fully biologically active when compared to standard. The ED50 as determined by a cytotoxicity assay using murine L929 cells is less than 0.1 ng/ml, corresponding to a

specific activity of  $> 1.0 \times 10^7$  IU/mg in the presence of actinomycin D.

**Molecular Mass**

Approximately 17.4 kDa. The recombinant murine TNF- $\alpha$  is a soluble 157 amino acid protein which corresponds to C-terminal extracellular domain of the full length transmembrane protein.

**AA Sequence**

MLRSSSQNSSDKPVAHVVANHQVEEQLEWLSQRANALLANGMDLKDNQLVVPADG  
LYLVYSQVLFKGGQCPDYVLLTHTVSRFAISYQEKVNLLSAVKSPCKDTPEGAELK  
PWYEPIYLGGVFQLEKGDQLSAEVNLPKYLDFAESGQVYFGVIAL

**Endotoxin**

Less than 1 EU/ $\mu$ g of rMuTNF- $\alpha$  as determined by LAL method.

**Purity**

>98% by SDS-PAGE and HPLC analysis.

**Storage**

Use a manual defrost freezer and avoid repeated freeze-thaw cycles. 12 months from date of receipt, -20 to -70 centigrade as supplied. 1 month, 2 to 8 centigrade under sterile conditions after reconstitution. 3 months, -20 to -70 centigrade under sterile conditions after reconstitution.

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Reconstitute in sterile distilled water or aqueous buffer containing 0.1 % BSA to a concentration of 0.1-1.0 mg/mL. Stock solutions should be apportioned into working aliquots and stored at  $\leq -20$  centigrade. Further dilutions should be made in appropriate buffered solutions.

## GENE INFORMATION

**Gene Name**

Tnf

**Official Symbol**

Tnf
