

Recombinant Human UNC5C Protein, His Tagged

Cat. No. UNC5C-001H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human UNC5C Protein (40-376 aa) with His tag was expressed in HEK293.
Species	Human
Source	HEK293
ProteinLength	40-376 aa
Description	This gene product belongs to the UNC-5 family of netrin receptors. Netrins are secreted proteins that direct axon extension and cell migration during neural development. They are bifunctional proteins that act as attractants for some cell types and as repellents for others, and these opposite actions are thought to be mediated by two classes of receptors. The UNC-5 family of receptors mediate the repellent response to netrin; they are transmembrane proteins containing 2 immunoglobulin (Ig)-like domains and 2 type I thrombospondin motifs in the extracellular region.
