

Human YWHAG Knockdown Cell Lysate

Cat. No. YWHAG-318HKCL Lot. No. (See product label)

SPECIFICATION

Product Overview	WB-validated YWHAG Knockdown HeLa Cell Lysate
Species	Human
Source	HeLa
Description	<p>This gene product belongs to the 14-3-3 family of proteins which mediate signal transduction by binding to phosphoserine-containing proteins. This highly conserved protein family is found in both plants and mammals, and this protein is 100% identical to the rat ortholog. It is induced by growth factors in human vascular smooth muscle cells, and is also highly expressed in skeletal and heart muscles, suggesting an important role for this protein in muscle tissue. It has been shown to interact with RAF1 and protein kinase C, proteins involved in various signal transduction pathways.</p>
Form	Cell-Tissue Lysis buffer
Molecular Mass	28 kDa
Notes	<p>Instruction of use: This knockdown cell lysate should be paired with wild-type HeLa cell lysate for use. For Western blotting, we recommend running wild-type and knockdown lysates on the same gel, and loading each well with equal volume and equal amount of total proteins.</p>
Storage	Store at -20 centigrade for two years.
