

Recombinant Human ZNF43 cell lysate

Cat. No. ZNF43-2024HCL Lot. No. (See product label)

SPECIFICATION

Species

Human

Description

This gene belongs to the C2H2-type zinc finger gene family. The zinc finger proteins are involved in gene regulation and development, and are quite conserved throughout evolution. Like this gene product, a third of the zinc finger proteins containing C2H2 fingers also contain the KRAB domain, which has been found to be involved in protein-protein interactions.
