

Recombinant Human ZWINT Protein, His-tagged

Cat. No. ZWINT-458H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human ZWINT(Met1-Pro277), transcript variant 3, fused with His tag at C-terminal was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	1-277 a.a.
Description	This gene encodes a protein that is clearly involved in kinetochore function although an exact role is not known. It interacts with ZW10, another kinetochore protein, possibly regulating the association between ZW10 and kinetochores. The encoded protein localizes to prophase kinetochores before ZW10 does and it remains detectable on the kinetochore until late anaphase. It has a uniform distribution in the cytoplasm of interphase cells. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
Form	Lyophilized from a 0.2 M filtered solution of 20mM Phosphate buffer, 150mM NaCl, pH 7.2. Stable for at least 6 months from date of receipt under proper storage and handling conditions.
Molecular Mass	33.4 kDa
Endotoxin	< 0.1 EU per g protein as determined by LAL test
