

Recombinant Human SNRPC

Cat. No. SNRPC-30583TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human SNRPC with N-terminal proprietary tag. Predicted MW 43.56kDa.
Species	Human
Source	Wheat Germ
ProteinLength	159 amino acids
Description	This gene encodes one of the specific protein components of the U1 small nuclear ribonucleoprotein (snRNP) particle required for the formation of the spliceosome. The encoded protein participates in the processing of nuclear precursor messenger RNA splicing. snRNP particles are attacked by autoantibodies frequently produced by patients with connective tissue diseases. The genome contains several pseudogenes of this functional gene. Alternative splicing results in a non-coding transcript variant.
