

Recombinant Human SERTAD3 Protein, GST-HIS-tagged

Cat. No. SERTAD3-045H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human SERTAD3, transcript variant 1, fused with N-terminal GST and C-terminal His was expressed in E. coli.
Species	Human
Source	E.coli
Description	The protein encoded by this gene was identified in a yeast two-hybrid assay employing the second subunit of human replication protein A as bait. It is localized to the nucleus and its expression is significantly higher in cancer cell lines compared to normal cell lines. This protein has also been shown to be a strong transcriptional co-activator. Alternative splicing has been observed at this locus and two variants, both encoding the same protein, have been identified. [provided by
