

## Recombinant Human ZSCAN9 Protein, HIS-tagged

**Cat. No.** ZSCAN9-101H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                            |
|-------------------------|------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human ZSCAN9, transcript variant 2, fused with His tag at N-terminal was expressed in E. coli. |
| <b>Species</b>          | Human                                                                                                      |
| <b>Source</b>           | E.coli                                                                                                     |
| <b>Description</b>      | May be involved in transcriptional regulation.                                                             |
| <b>Form</b>             | 50mM Tris, pH8.0, 8M Urea.                                                                                 |
| <b>Molecular Mass</b>   | 45.8 kDa                                                                                                   |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                                |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                                           |

### GENE INFORMATION

|                        |                                                                          |
|------------------------|--------------------------------------------------------------------------|
| <b>Gene Name</b>       | ZSCAN9 zinc finger and SCAN domain containing 9 [ Homo sapiens (human) ] |
| <b>Official Symbol</b> | ZSCAN9                                                                   |
| <b>Synonyms</b>        | PRD51; ZNF193; ZSCAN9;                                                   |
