

Recombinant Human ADORA3 Protein

Cat. No. ADORA3-371H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human ADORA3 full-length ORF (NP_000668.1) recombinant protein without tag.
Species	Human
Source	Wheat Germ
Description	<p>This gene encodes a protein that belongs to the family of adenosine receptors, which are G-protein-coupled receptors that are involved in a variety of intracellular signaling pathways and physiological functions. The receptor encoded by this gene mediates a sustained cardioprotective function during cardiac ischemia, it is involved in the inhibition of neutrophil degranulation in neutrophil-mediated tissue injury, it has been implicated in both neuroprotective and neurodegenerative effects, and it may also mediate both cell proliferation and cell death. Alternative splicing results in multiple transcript variants. This gene shares its 5' terminal exon with some transcripts from overlapping GenelD:57413, which encodes an immunoglobulin domain-containing protein. [provided by RefSeq, Nov 2014]</p>
