

Recombinant Trypanosoma cruzi Chimeric Chagas Multiantigen Protein, His-tagged

Cat. No. MACH-822T Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Trypanosoma cruzi Chimeric Chagas Multiantigen was expressed in E. coli with His tag.
Species	Trypanosoma cruzi
Source	E.coli
Description	Recombinant Chimeric Chagas Multiantigen (MACH) (Trypanosoma cruzi) produced in E.Coli, is a polypeptide chain of 87 aa with epitopes PEP-2, TcD, TcE and SAPA. The protein is fused to a 6His-tag. Trypanosoma cruzi, better known as T. cruzi, is a deadly parasite that causes Chagas' disease. This disease is a chronic infection, which primarily affects the heart and nervous system, causing severe neurological disorders, as well as swelling or denervation of nervous tissue in the heart, colon and esophagus. Chagas disease often goes undiagnosed due to close association of symptoms to heart disease and a variety of other disorders. The organism can circulate in the blood of infected patients for many years after infection, and can lead to transfusion-acquired infections in blood recipients from these infected donors. Contaminated blood transfusions are suspected to be the primary way in which the parasite has been transmitted to industrialized countries.
Form	Lyophilized from 20mM Tris-HCl pH 8.5, 100mM sodium chloride, 20% trehalose and 0.1% sodium azide

 Tel: 1-631-559-9269 1-516-512-3133

 45-1 Ramsey Road, Shirley, NY 11967, USA

Purity	> 90 % (SDS-PAGE)
Applications	ELISA; Lateral flow
Storage	Store at -20 centigrade, avoid freeze/thaw cycles.
