Recombinant Human CREG1 Protein, His-tagged

Cat. No. CREG1-227H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human CREG1 fused with His tag at N-terminal was expressed in E. coli.
Species	Human
Source	E.coli
Description	The adenovirus E1A protein both activates and represses gene expression to promote cellular proliferation and inhibit differentiation. The protein encoded by this gene antagonizes transcriptional activation and cellular transformation by E1A. This protein shares limited sequence similarity with E1A and binds both the general transcription factor TBP and the tumor suppressor pRb in vitro. This gene may contribute to the transcriptional control of cell growth and differentiation.
Form	The Product was lyophilized from a sterile solution of 1 x PBS, PH7.4.
Molecular Mass	23.9 kDa
Purity	> 90% as determined by SDS-PAGE and Coomassie blue staining
Concentration	>50 ug/mL as determined by microplate BCA method
