

Recombinant Human TAC1

Cat. No. TAC1-30838TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human TAC1 with proprietary tag, Predicted MWt 40.26kDa including the tag.
Species	Human
Source	Wheat Germ
ProteinLength	129 amino acids
Description	This gene encodes four products of the tachykinin peptide hormone family, substance P and neurokinin A, as well as the related peptides, neuropeptide K and neuropeptide gamma. These hormones are thought to function as neurotransmitters which interact with nerve receptors and smooth muscle cells. They are known to induce behavioral responses and function as vasodilators and secretagogues. Multiple transcript variants encoding different isoforms have been found for this gene.
