

Recombinant Human NKD2 Protein, His-tagged

Cat. No. NKD2-445H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human NKD2 fused with His tag at N-terminal was expressed in E. coli.
Species	Human

Description	This gene encodes a member of a family of proteins that function as negative regulators of Wnt receptor signaling through interaction with Dishevelled family members. The encoded protein participates in the delivery of transforming growth factor alpha-containing vesicles to the cell membrane. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene.
