

Recombinant Human SGK3 Protein, His-tagged

Cat. No. SGK3-472H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human SGK3, transcript variant 3, fused with His tag at N-terminal was expressed in E. coli.
Species	Human
Source	E.coli
Description	This gene is a member of the Ser/Thr protein kinase family and encodes a phosphoprotein with a PX (phox homology) domain. The protein phosphorylates several target proteins and has a role in neutral amino acid transport and activation of potassium and chloride channels. Alternate transcriptional splice variants, encoding different isoforms, have been characterized.
