

Recombinant Human TNPO1

Cat. No. TNPO1-31605TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant fragment of Human Transportin 1 with a N terminal proprietary tag: predicted molecular weight 38.50 kDa.
Species	Human
Source	Wheat Germ
ProteinLength	117 amino acids
Description	This gene encodes the beta subunit of the karyopherin receptor complex which interacts with nuclear localization signals to target nuclear proteins to the nucleus. The karyopherin receptor complex is a heterodimer of an alpha subunit which recognizes the nuclear localization signal and a beta subunit which docks the complex at nucleoporins. Alternate splicing of this gene results in two transcript variants encoding different proteins.
Molecular Weight	38.500kDa inclusive of tags
