

Recombinant Human MCM5 Protein, GST and His-tagged

Cat. No. MCM5-009H Lot. No. (See product label)

SPECIFICATION

Product Overview	Purified recombinant protein of full length Human minichromosome maintenance complex component 5 (MCM5), with N-terminal GST and C-terminal HIS tag, was expressed in E. coli.
Species	Human
Source	E.coli
Description	The protein encoded by this gene is structurally very similar to the CDC46 protein from <i>S. cerevisiae</i> , a protein involved in the initiation of DNA replication. The encoded protein is a member of the MCM family of chromatin-binding proteins and can interact with at least two other members of this family. The encoded protein is upregulated in the transition from the G0 to G1/S phase of the cell cycle and may actively participate in cell cycle regulation. [provided by RefSeq, Jul 2008]
