

# Recombinant Rhesus Monkey INSR Protein

**Cat. No.** INSR-1604R    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                         |
|-------------------------|---------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Rhesus monkey INSR Protein (XP_005587797 ( aa.32-956)) was expressed in human HEK293 cells. |
| <b>Species</b>          | Rhesus macaque                                                                                          |
| <b>Source</b>           | HEK293                                                                                                  |
| <b>ProteinLength</b>    | 32-956 a.a.                                                                                             |
| <b>Form</b>             | PBS, pH7.4.                                                                                             |
| <b>Purity</b>           | > 95 %                                                                                                  |
| <b>Applications</b>     | ELISA; WB; Immunogen                                                                                    |
| <b>Storage</b>          | -80 centigrade, Avoid freeze/thaw cycle.                                                                |
| <b>Concentration</b>    | 1 mg/mL                                                                                                 |

## GENE INFORMATION

|                        |                                                                            |
|------------------------|----------------------------------------------------------------------------|
| <b>Gene Name</b>       | INSR insulin receptor [ <i>Macaca fascicularis</i> (crab-eating macaque) ] |
| <b>Official Symbol</b> | INSR                                                                       |
