

## Recombinant Rhesus Monkey PRNP Protein, hlgG1-tagged

Cat. No. PRNP-1617R    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                                        |
|------------------|------------------------------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant Rhesus monkey PRNP Protein (NP_001040617 ( aa.22-230)) was expressed in human HEK293 cells with hlgG1 tag. |
| Species          | Rhesus macaque                                                                                                         |
| Source           | HEK293                                                                                                                 |
| ProteinLength    | 22-230 a.a.                                                                                                            |
| Form             | PBS, pH7.4.                                                                                                            |
| Purity           | > 95 %                                                                                                                 |
| Applications     | ELISA; WB; Immunogen                                                                                                   |
| Storage          | -80 centigrade, Avoid freeze/thaw cycle.                                                                               |
| Concentration    | 1 mg/mL                                                                                                                |

### GENE INFORMATION

|                 |                                                       |
|-----------------|-------------------------------------------------------|
| Gene Name       | PRNP prion protein [ Macaca mulatta (Rhesus monkey) ] |
| Official Symbol | PRNP                                                  |
