

## Recombinant Rhesus Monkey TNFRSF25 Protein, hlgG4-tagged

**Cat. No.** TNFRSF25-1812R    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                               |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Rhesus monkey TNFRSF25 Protein (F7GXU5 ( aa.25-209)) was expressed in human HEK293 cells with hlgG4 tag.                                                                                                                                                                                                                          |
| <b>Species</b>          | Rhesus macaque                                                                                                                                                                                                                                                                                                                                |

| <b>ProteinLength</b>    | 25-209 a.a.                                                                                                                                                                                                                                                                                                                                   |
| <b>Description</b>      | DR3/TNFRSF25 is a member of TNFR superfamily which is expressed preferentially by activated and antigen-experienced T lymphocytes. TNFRSF25 is also highly expressed by FoxP3 positive regulatory T lymphocytes. TNFRSF25 is activated by a monogamous ligand, known as TL1A (TNFSF15). May play a role in regulating lymphocyte homeostasis. |
| <b>Form</b>             | PBS, pH7.4.                                                                                                                                                                                                                                                                                                                                   |
| <b>Purity</b>           | > 95 %                                                                                                                                                                                                                                                                                                                                        |
| <b>Applications</b>     | WB; ELISA; Immunogen                                                                                                                                                                                                                                                                                                                          |
| <b>Storage</b>          | -80 centigrade, Avoid freeze/thaw cycle.                                                                                                                                                                                                                                                                                                      |
| <b>Concentration</b>    | 1 mg/mL                                                                                                                                                                                                                                                                                                                                       |

## GENE INFORMATION

**Gene Name** TNFRSF25 TNF receptor superfamily member 25 [ *Macaca mulatta* (Rhesus monkey) ]

**Official Symbol** TNFRSF25

**Synonyms** TNFRSF25; tumor necrosis factor receptor superfamily; member 25; TNFRSF12; tumor necrosis factor receptor superfamily; member 12 (translocating chain association membrane protein); tumor necrosis factor receptor superfamily member 25; APO 3; DDR3; DR3; LARD; TR3; TRAMP; WSL 1; WSL LR; protein WSL-1; death receptor beta; apoptosis inducing receptor; apoptosis-inducing receptor AIR; apoptosis-mediating receptor DR3; apoptosis-mediating receptor TRAMP; death domain receptor 3 soluble form; lymphocyte-associated receptor of death; tumor necrosis factor receptor superfamily; member 12 (translocating chain-association membrane protein); APO-3; WSL-1; WSL-LR; TNFRSF12;

**Gene ID** 703744

**mRNA Refseq** XM\_015142519.1

**Protein Refseq** XP\_014998005.1
