| <b>Product Overview</b> | Recombinant Mouse Cdh3 aa. (Ser565~Asp822 (Accession # P10287)) fused with N-terminal His & GST tag was produced in E. coli cells.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| <b>Description</b>      | This gene encodes a calcium-dependent cell-cell adhesion protein containing five cadherin domains. The encoded protein plays a role in epithelial outgrowth, such as that which occurs during the development of hair follicles and limb buds. Loss of function of the related gene in humans results in ectodermal dysplasia, ectrodactyly, and macular dystrophy and congenial hypotrichosis with juvenile macular dystrophy. This gene is located in the vicinity of similar cadherin genes on chromosome 8. The proprotein is further cleaved into a functional chain. Alternative splicing results in multiple transcript variants. |
| <b>Form</b>             | Freeze-dried powder                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Characteristic</b> | The isoelectric point is 4.7.                                                                                                                                                                                                                                                                                                       |
| <b>Applications</b>   | SDS-PAGE; WB; ELISA; IP.                                                                                                                                                                                                                                                                                                            |
| <b>Stability</b>      | The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition. |
| <b>Storage</b>        | Avoid repeated freeze/thaw cycles. Store at 2-8°C for one month. Aliquot and store at -80°C for 12 months.                                                                                                                                                                                                                          |
| <b>Storage buffer</b> | Supplied as lyophilized form in PBS, pH7.4, containing 5% sucrose, 0.01% sarcosyl.                                                                                                                                                                                                                                                  |
| <b>Reconstitution</b> | Reconstitute in sterile PBS, pH7.2-pH7.4.                                                                                                                                                                                                                                                                                           |

|------------------------|-----------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>       | Cdh3 cadherin 3 [ <i>Mus musculus</i> (house mouse) ]                                                           |
| <b>Official Symbol</b> | Cdh3                                                                                                            |
| <b>Synonyms</b>        | Cdh3; cadherin 3; Cadp; Cdhp; Pcad; AI385538; P-cadherin; cadherin-3; RPE-specific cadherin; placental cadherin |
| <b>Gene ID</b>         | 12560                                                                                                           |
| <b>mRNA Refseq</b>     | NM_001037809.5                                                                                                  |
| <b>Protein Refseq</b>  | NP_001032898.1                                                                                                  |
