

Recombinant Human ZNF384 protein, His & T7-tagged

Cat. No. ZNF384-1501H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human ZNF384 aa. (Ser307~Pro540 (Accession # Q8TF68)) fused with N-terminal His & T7 tag was produced in E. coli cells.
Species	Human
Source	E.coli
ProteinLength	Ser307~Pro540
Description	This gene encodes a C2H2-type zinc finger protein, which may function as a transcription factor. This gene also contains long CAG trinucleotide repeats that encode consecutive glutamine residues. The protein appears to bind and regulate the promoters of the extracellular matrix genes MMP1, MMP3, MMP7 and COL1A1. Studies in mouse suggest that nuclear matrix transcription factors (NP/NMP4) may be part of a general mechanical pathway that couples cell construction and function during extracellular matrix remodeling. Alternative splicing results in multiple transcript variants. Recurrent rearrangements of this gene with the Ewing's sarcoma gene, EWSR1 on chromosome 22, or with the TAF15 gene on chromosome 17, or with the TCF3 (E2A) gene on chromosome 19, have been observed in acute leukemia. A related pseudogene has been identified on chromosome 7.
Form	Freeze-dried powder
Molecular Mass	Predicted Molecular Mass: 29.8kDa.

 45-1 Ramsey Road, Shirley, NY 11967, USA

Endotoxin	<1.0EU per 1g (determined by the LAL method).
Purity	>95%
Characteristic	The isoelectric point is 9.6.
Applications	SDS-PAGE; WB; ELISA; IP.
Stability	The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.
Storage	Avoid repeated freeze/thaw cycles. Store at 2-8°C for one month. Aliquot and store at -80°C for 12 months.
Storage buffer	Supplied as lyophilized form in PBS, pH7.4, containing 5% trehalose, 0.01% sarcosyl.
Reconstitution	Reconstitute in sterile PBS, pH7.2-pH7.4.

GENE INFORMATION

Gene Name	ZNF384 zinc finger protein 384 [Homo sapiens (human)]
Official Symbol	ZNF384
Synonyms	NP; CIZ; NMP4; CAGH1; ERDA2; TNRC1; CAGH1A; CAG repeat protein 1; Cas-interacting zinc finger protein; expanded repeat domain,; CAG/CTG 2; nuclear matrix transcription factor 4; trinucleotide repeat-containing gene 1 protein; zinc finger protein 384
