

Native Bovine Fetuin Protein

Cat. No. Fetuin-5263B **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Bovine Fetuin is produced from selected, extensively tested serum where low bacterial and low haemoglobin contamination are a condition of use.
Species	Bovine
Source	Bovine
Description	Fetuin is a mixture of proteins and other compounds containing a wide range of growth and attachment factors normally found in foetal calf serum. The major protein components include α -1-glycoprotein with a molecular weight of 48.4kD. It is composed of approximately 74% protein with a carbohydrate moiety (sialic acid) attached. The other components in Fetuin include α -1 and α -2 globulins, β -globulins and a variety of growth factors such as IGFs and FGFs.
Applications	Cell culture to enhance cell growth rates; Cell culture to increase protein production; Adherent cell culture to facilitate cell attachment; Serum reduced or serum free media supplement
Storage	Product is shipped at ambient temperature however, recommended storage is at 2-8 centigrade.
