Recombinant Human YWHAQ

Cat. No. YWHAQ-26017TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human 14-3-3 Tau; amino acids 1-245, MWt 29kDa.
Species	Human
Source	E.coli
ProteinLength	1-245 a.a.
Description	This gene product belongs to the 14-3-3 family of proteins which mediate signal transduction by binding to phosphoserine-containing proteins. This highly conserved protein family is found in both plants and mammals, and this protein is 99% identical to the mouse and rat orthologs. This gene is upregulated in patients with amyotrophic lateral sclerosis. It contains in its 5 UTR a 6 bp tandem repeat sequence which is polymorphic, however, there is no correlation between the repeat number and the disease.
Tissue specificity	Abundantly expressed in brain, heart and pancreas, and at lower levels in kidney and placenta. Up-regulated in the lumbar spinal cord from patients with sporadic amyotrophic lateral sclerosis (ALS) compared with controls, with highest levels of expression
