

## Recombinant Human ZNF232, His-tagged

**Cat. No.** ZNF232-30756TH **Lot. No.** (See product label)

### SPECIFICATION

|                                 |                                                                                                                                                                                                                                                                                                              |
|---------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b>         | Recombinant fragment, corresponding to amino acids 1-296 of Human ZNF232 with N terminal His tag; MWt 34 kDa.                                                                                                                                                                                                |
| <b>Species</b>                  | Human                                                                                                                                                                                                                                                                                                        |
| <b>Source</b>                   | E.coli                                                                                                                                                                                                                                                                                                       |
| <b>ProteinLength</b>            | 1-296 a.a.                                                                                                                                                                                                                                                                                                   |
| <b>Conjugation</b>              | HIS                                                                                                                                                                                                                                                                                                          |
| <b>Tissue specificity</b>       | Ubiquitous. Higher expression seen in the liver, testis and ovary.                                                                                                                                                                                                                                           |
| <b>Form</b>                     | Lyophilised:Reconstitute with 122 µl aqua dest.                                                                                                                                                                                                                                                              |
| <b>Storage buffer</b>           | Preservative: NoneConstituents: 0.5% Trehalose, 6M Urea, 100mM Sodium phosphate, 10mM Sodium chloride, pH 4.5                                                                                                                                                                                                |
| <b>Storage</b>                  | Shipped at 4°C. Upon delivery aliquot and store at -80oC. Avoid freeze / thaw cycles.                                                                                                                                                                                                                        |

WSPAQEESFRQMVVIHKEI

**Sequence** Belongs to the krueppel C2H2-type zinc-finger protein family.Contains 5 C2H2-type  
**Similarities** zinc fingers.Contains 1 SCAN box domain.

## GENE INFORMATION

**Gene Name** ZNF232 zinc finger protein 232 [ Homo sapiens ]

**Official Symbol** ZNF232

**Synonyms** ZNF232; zinc finger protein 232; ZSCAN11;

**Gene ID** 7775

**mRNA Refseq** NM\_014519

**Protein Refseq** NP\_055334

**Uniprot ID** Q9UNY5

**Chromosome Location** 17p13.2

**Function** DNA binding; metal ion binding; sequence-specific DNA binding transcription factor activity; zinc ion binding;
