

Recombinant Rattus Clusterin, His-tagged, T7-tagged

Cat. No. Clu-108R **Lot. No.** (See product label)

SPECIFICATION

Product Overview	The Rat Clusterin was constructed as a recombinant protein with N-terminal fusion of T7-Tag (16AA) and C-terminal fusion of His-Tag (9AA). The Clusterin Rat His-Tagged Fusion Protein, produced in <i>E.coli</i> , is 26.5 kDa protein containing 215 amino acid residues of the APO-J Rat and 25 additional amino acid residues – His-Tag, T7-Tag.
Species	Rat
Source	E.coli
Description	Clusterin also named Apolipoprotein J (APO-J) is a 75-80 kD disulfide-linked heterodimeric protein containing about 30% of N-linked carbohydrate rich in sialic acid. The precursor polypeptide chain is cleaved proteolytically to remove the 22-mer secretory signal peptide and subsequently between residues 227/228 to generate and the chains. These are assembled in anti-parallel to give a heterodimeric molecule in which the cysteine-rich centers are linked by five disulfide bridges and are flanked by two predicted coiled-coil -helices and three predicted amphipathic α -helices. It is able to bind and form complexes with numerous partners such as immunoglobulins, lipids, heparin, bacteria, complement components, paraoxonase, beta amyloid, leptin and others.

Specificity

The amino acid sequence of the Clusterin Rat recombinant is 100% homologous to the amino acid sequence 146-360 of the Clusterin Rat precursor.

Purification Method

Ni-NTA chromatography.

Purity

Greater than 95% (SDS PAGE analyzed).

Formulation

Sterile filtered and lyophilized from 0.5 mg/ml in 0.01M Tris pH 7.2.

Solubility

Add 0.2 ml of deionized H₂O and let the lyophilized pellet dissolve completely.

Applications

Western blotting

Storage

Store lyophilized protein at -20°C. Aliquot the product after reconstitution to avoid repeated freezing/thawing cycles. Reconstituted protein can be stored at 4°C for a limited period of time; it does not show any change after two weeks at 4°C. The lyophilized protein remains stable until the expiry date when stored at -20°C.

GENE INFORMATION

Gene Name

[Clu clusterin \[Rattus norvegicus \]](#)
