

Recombinant Human Hepatic Leukemia Factor, His-tagged

Cat. No. HLF-5023H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant humanHLF protein, fused to His-tag at N-terminus, was expressed in E. coli andpurified by using conventional chromatography.
Species	Human
Source	Human
Description	HLF, also known ashepatic leukemia factor, belongs to the bZIP family and the PAR (proline andacidic-rich) subfamily of transcription regulatory proteins. HLF binds DNAspecifically as a homodimer or heterodimer with other PAR factors. It is highlyexpressed in liver, with lower levels in lung and kidney and functions as apotent trans-activator.
