

Recombinant Human Colony Stimulating Factor 1 (macrophage)

Cat. No. CSF1-339H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human CSF1 was expressed in E. coli and purified recombinant Human CSF1 protein.
Species	Human
Source	Human
Description	CSF1 is a potent hematopoietic factor produced by a variety of cells including lymphocytes, monocytes, fibroblasts, endothelial cells, myoblasts and osteoblasts. It is a key regulator of cellular proliferation, differentiation, and survival of blood monocytes, tissue macrophages and their progenitor cells. CSF1 has been shown to play important roles in modulating dermal thickness, and male and female fertility. CSF1 is clinically used in the treatment of infection, malignancies and atherosclerosis. It facilitates hematopoietic recovery after bone marrow transplantation.
Form	Supplied as lyophilized powder.
