

## Recombinant Human GGH Protein, MYC/DDK-tagged

Cat. No. GGH-25H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                                                                                  |
|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant Human GGH was expressed in HEK293 with C-terminal MYC/DDK tag.                                                                                       |
| Species          | Human                                                                                                                                                            |
| Source           | HEK293                                                                                                                                                           |
| Description      | This gene catalyzes the hydrolysis of folylpoly-gamma-glutamates and antifolylpoly-gamma-glutamates by the removal of gamma-linked polyglutamates and glutamate. |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                                                                                            |
| Molecular Mass   | 33.6 kDa                                                                                                                                                         |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                                                                                      |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                                                                                                 |

### GENE INFORMATION

|                 |                                                                                             |
|-----------------|---------------------------------------------------------------------------------------------|
| Gene Name       | GGH gamma-glutamyl hydrolase (conjugase, folylpolygammaglutamyl hydrolase) [ Homo sapiens ] |
| Official Symbol | GGH                                                                                         |
| Synonyms        | GGH; gamma-glutamyl hydrolase (conjugase, folylpolygammaglutamyl hydrolase);                |
