

## Recombinant Human TMEM11 Protein, MYC/DDK-tagged

Cat. No. TMEM11-294H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                               |
|------------------|---------------------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant Human TMEM11, transcript variant 1, fused with MYC/DDK tag at C-terminal was expressed in HEK293. |
| Species          | Human                                                                                                         |
| Source           | HEK293                                                                                                        |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                                         |
| Molecular Mass   | 21.4 kDa                                                                                                      |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                                   |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                                              |

### GENE INFORMATION

|                 |                                                  |
|-----------------|--------------------------------------------------|
| Gene Name       | TMEM11 transmembrane protein 11 [ Homo sapiens ] |
| Official Symbol | TMEM11                                           |
| Synonyms        | PM1; PMI; C17orf35                               |
| Gene ID         | 8834                                             |
