

## Recombinant Human TMEM120A Protein, MYC/DDK-tagged

Cat. No. TMEM120A-320H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                          |
|------------------|------------------------------------------------------------------------------------------|
| Product Overview | Recombinant Human TMEM120A fused with MYC/DDK tag at C-terminal was expressed in HEK293. |
| Species          | Human                                                                                    |
| Source           | HEK293                                                                                   |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                    |
| Molecular Mass   | 40.4 kDa                                                                                 |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                              |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                         |

### GENE INFORMATION

|                 |                                                                                                                   |
|-----------------|-------------------------------------------------------------------------------------------------------------------|
| Gene Name       | TMEM120A transmembrane protein 120A [ Homo sapiens ]                                                              |
| Official Symbol | TMEM120A                                                                                                          |
| Synonyms        | TMEM120A; transmembrane protein 120A; NET29; TMPIT; transmembrane protein induced by tumor necrosis factor alpha; |
| Gene ID         | 83862                                                                                                             |
