

## Recombinant Human FAM72D Protein, MYC/DDK-tagged

Cat. No. FAM72D-335H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                        |
|------------------|----------------------------------------------------------------------------------------|
| Product Overview | Recombinant Human FAM72D fused with MYC/DDK tag at C-terminal was expressed in HEK293. |
| Species          | Human                                                                                  |
| Source           | HEK293                                                                                 |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                  |
| Molecular Mass   | 16.5 kDa                                                                               |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                            |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                       |

### GENE INFORMATION

|                 |                                                                             |
|-----------------|-----------------------------------------------------------------------------|
| Gene Name       | FAM72D family with sequence similarity 72 member D [ Homo sapiens ]         |
| Official Symbol | FAM72D                                                                      |
| Synonyms        | GCUD2; gastric cancer up-regulated protein 2; gastric cancer up-regulated-2 |
| Gene ID         | 728833                                                                      |
