

## Recombinant Human FAM221A Protein, MYC/DDK-tagged

**Cat. No.** FAM221A-379H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                |
|-------------------------|----------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human FAM221A, transcript variant 2, fused with MYC/DDK tag at C-terminal was expressed in HEK293. |
| <b>Species</b>          | Human                                                                                                          |
| <b>Source</b>           | HEK293                                                                                                         |
| <b>Form</b>             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                                          |
| <b>Molecular Mass</b>   | 29.2 kDa                                                                                                       |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                                    |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                                               |

### GENE INFORMATION

|                        |                                                                        |
|------------------------|------------------------------------------------------------------------|
| <b>Gene Name</b>       | FAM221A family with sequence similarity 221, member A [ Homo sapiens ] |
| <b>Official Symbol</b> | FAM221A                                                                |
| <b>Synonyms</b>        | C7orf46                                                                |
| <b>Gene ID</b>         | 340277                                                                 |
