

## Recombinant Human C16orf72 Protein, MYC/DDK-tagged

**Cat. No.** C16orf72-598H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                          |
|-------------------------|------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human C16orf72 fused with MYC/DDK tag at C-terminal was expressed in HEK293. |
| <b>Species</b>          | Human                                                                                    |
| <b>Source</b>           | HEK293                                                                                   |
| <b>Form</b>             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                    |
| <b>Molecular Mass</b>   | 30.7 kDa                                                                                 |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                              |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                         |

### GENE INFORMATION

|                        |                                                                                             |
|------------------------|---------------------------------------------------------------------------------------------|
| <b>Gene Name</b>       | C16orf72 chromosome 16 open reading frame 72 [ Homo sapiens ]                               |
| <b>Official Symbol</b> | C16orf72                                                                                    |
| <b>Synonyms</b>        | C16ORF72; chromosome 16 open reading frame 72; UPF0472 protein C16orf72; FLJ41272; PRO0149; |
| <b>Gene ID</b>         | 29035                                                                                       |
