

Recombinant Human CLCN5 Protein, GST-tagged

Cat. No. CLCN5-1418H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human CLCN5 full-length ORF (NP_000075.1, 1 a.a. - 746 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	This gene encodes a member of the CIC family of chloride ion channels and ion transporters. The encoded protein is primarily localized to endosomal membranes and may function to facilitate albumin uptake by the renal proximal tubule. Mutations in this gene have been found in Dent disease and renal tubular disorders complicated by nephrolithiasis. Alternatively spliced transcript variants have been found for this gene.
