

Recombinant Human DGCR8 Protein, GST-tagged

Cat. No. DGCR8-2567H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human DGCR8 full-length ORF (NP_073557.3, 1 a.a. - 773 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	This gene encodes a subunit of the microprocessor complex which mediates the biogenesis of microRNAs from the primary microRNA transcript. The encoded protein is a double-stranded RNA binding protein that functions as the non-catalytic subunit of the microprocessor complex. This protein is required for binding the double-stranded RNA substrate and facilitates cleavage of the RNA by the ribonuclease III protein, Drosha. Alternate splicing results in multiple transcript variants. [provided by RefSeq, Jun 2010]
