

Recombinant Human Dual Specificity Phosphatase 10, His-tagged

Cat. No. DUSP10-1392H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant humanDUSP10 protein, fused to His-tag at N-terminus, was expressed in E. coli andpurified by using conventional chromatography techniques.
Species	Human
Source	E.coli
Description	DUSP10 (Dualspecificity protein phosphatase 10) belongs to the protein-tyrosinephosphatase family. Dual specificity protein phosphatases(DUSPs) inactivatetheir target kinases by dephosphorylating both the phosphoserine/threonineand phosphotyrosine residues. They negatively regulate members of the MAPKsuperfamily (MAPK/ERK, SAPK/JNK, p38), which is associated with cellularproliferation and differentiation. DUSP10 has been shown to interact withMAPK14 and MAPK8. When expressed in mammalian cells, DUSP10 blocks theenzymatic activation of MAP kinases with the selectivity p38 approximatelyJNK/SAPK >> ERK.
