

## Recombinant Rat Rnh1 protein, His & T7-tagged

**Cat. No.** Rnh1-6969R    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                           |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Rat Rnh1 aa. (Ser108~Lys358 (Accession # P29315)) fused with N-terminal His & T7 tag was produced in E. coli cells.                                           |
| <b>Species</b>          | Rat                                                                                                                                                                       |
| <b>Source</b>           | E.coli                                                                                                                                                                    |
| <b>ProteinLength</b>    | Ser108~Lys358                                                                                                                                                             |
| <b>Description</b>      | Ribonuclease inhibitor.                                                                                                                                                   |
| <b>Form</b>             | Freeze-dried powder                                                                                                                                                       |
| <b>Molecular Mass</b>   | Predicted Molecular Mass: 31.1kDa                                                                                                                                         |
| <b>Endotoxin</b>        | <1.0EU per 1ug (determined by the LAL method)                                                                                                                             |
| <b>Purity</b>           | >95%                                                                                                                                                                      |
| <b>Characteristic</b>   | The isoelectric point is 5.8.                                                                                                                                             |
| <b>Applications</b>     | SDS-PAGE; WB; ELISA; IP                                                                                                                                                   |
| <b>Stability</b>        | The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, |

and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.

**Storage**

Avoid repeated freeze/thaw cycles. Store at 2-8°C for one month. Aliquot and store at -80°C for 12 months.

**Storage buffer**

Supplied as lyophilized form in PBS, pH7.4, containing 5% sucrose, 0.01% sarcosyl.

**Reconstitution**

Reconstitute in sterile PBS, pH7.2-pH7.4.

## GENE INFORMATION

**Gene Name**

[Rnh1 ribonuclease/angiogenin inhibitor 1 \[ Rattus norvegicus \(Norway rat\) \]](#)

**Official Symbol**

[Rnh1](#)

**Synonyms**

Rnh1; ribonuclease/angiogenin inhibitor 1; Rnh; ribonuclease inhibitor

**Gene ID**
