

Recombinant Rat Serpin Peptidase Inhibitor, Clade E (nexin, plasminogen activator inhibitor type 1), Member 1

Cat. No. Serpine1-5516R **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant RatSerpine1 typically contains 95% active PAI-1.
Species	Rat
Source	E.coli
Description	Serpine1 is a serineprotease inhibitor (serpin) that functions as the principal inhibitor oftissue plasminogen activator (tPA) and urokinase (uPA), the activators ofplasminogen and hence fibrinolysis (the physiological breakdown of bloodclots). It is a serine protease inhibitor (serpin) protein (Serpine1). Theother PAI, plasminogen activator inhibitor-2 (PAI-2) is secreted by theplacenta and only present in significant amounts during pregnancy. Inaddition, protease nexin acts as an inhibitor of tPA and urokinase. Serpine1,however, is the main inhibitor of the plasminogen activators.
