| <b>Product Overview</b> | Recombinant Mouse Fcnc aa. (Gln97~Ser254 (Accession # O70497)) fused with N-terminal His & T7 tag was produced in E. coli cells.                                                                                                                                                                                                               |

| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                                         |
| <b>ProteinLength</b>    | Gln97~Ser254                                                                                                                                                                                                                                                                                                                                   |
| <b>Form</b>             | Freeze-dried powder                                                                                                                                                                                                                                                                                                                            |
| <b>Molecular Mass</b>   | Predicted Molecular Mass: 21.5kDa                                                                                                                                                                                                                                                                                                              |
| <b>Endotoxin</b>        | <1.0EU per 1ug (determined by the LAL method)                                                                                                                                                                                                                                                                                                  |
| <b>Purity</b>           | > 95%                                                                                                                                                                                                                                                                                                                                          |
| <b>Characteristic</b>   | The isoelectric point is 6.1.                                                                                                                                                                                                                                                                                                                  |
| <b>Applications</b>     | SDS-PAGE; WB; ELISA; IP.                                                                                                                                                                                                                                                                                                                       |
| <b>Stability</b>        | The thermal stability is described by the loss rate of the target protein. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed.<br>(Referring from China Biological Products Standard, which was calculated by the |

Arrhenius equation.) The loss of this protein is less than 5% within the expiration date under appropriate storage condition.

**Storage**

Avoid repeated freeze/thaw cycles. Store at 2-8°C for one month. Aliquot and store at -80°C for 12 months.

**Storage Buffer**

Supplied as lyophilized form in PBS, pH7.4, containing 5% sucrose, 0.01% sarcosyl.

**Reconstitution**

Reconstitute in sterile PBS, pH7.2-pH7.4.

## GENE INFORMATION

**Gene Name**

[Fcnb ficolin B \[ Mus musculus \(house mouse\) \]](#)

**Official Symbol**

[Fcnb](#)

**Synonyms**

HLF; HRF; MOP2; HIF2A; bHLHe73; HIF-2alpha; EPAS-1; HIF-1-alpha-like factor; HIF-2-alpha; HIF-related factor; HIF1 alpha-like factor; HIF1alpha-like factor; HIF2-alpha; HLF (HIF1alpha-like factor); Hif like protein; hypoxia inducible transcription factor 2alpha; hypoxia-inducible factor 2-alpha; mHLF; endothelial PAS domain-containing protein 1

**Gene ID**
