

# Recombinant Cattle S100A4 protein, His-tagged

**Cat. No.** S100A4-2120C    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                |

| <b>Product Overview</b> | Recombinant Cattle S100A4 aa. (Met1~Lys101 (Accession # P35466)) fused with N-terminal His tag was produced in E. coli cells.                                                                                                                                                                                                                  |
| <b>Species</b>          | Cattle                                                                                                                                                                                                                                                                                                                                         |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                                         |
| <b>ProteinLength</b>    | Met1~Lys101                                                                                                                                                                                                                                                                                                                                    |
| <b>Form</b>             | Freeze-dried powder                                                                                                                                                                                                                                                                                                                            |
| <b>Molecular Mass</b>   | Predicted Molecular Mass: 13.0kDa                                                                                                                                                                                                                                                                                                              |
| <b>Endotoxin</b>        | <1.0EU per 1ug (determined by the LAL method)                                                                                                                                                                                                                                                                                                  |
| <b>Purity</b>           | >95%                                                                                                                                                                                                                                                                                                                                           |
| <b>Characteristic</b>   | The isoelectric point is 6.6.                                                                                                                                                                                                                                                                                                                  |
| <b>Applications</b>     | SDS-PAGE; WB; ELISA; IP.                                                                                                                                                                                                                                                                                                                       |
| <b>Stability</b>        | The thermal stability is described by the loss rate of the target protein. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed.<br>(Referring from China Biological Products Standard, which was calculated by the |

Arrhenius equation.) The loss of this protein is less than 5% within the expiration date under appropriate storage condition.

**Storage**

Avoid repeated freeze/thaw cycles. Store at 2-8°C for one month. Aliquot and store at -80°C for 12 months.

**Storage Buffer**

Supplied as lyophilized form in PBS, pH7.4, containing 5% sucrose, 0.01% sarcosyl.

**Reconstitution**

Reconstitute in sterile PBS, pH7.2-pH7.4.

## GENE INFORMATION

**Gene Name**

S100A4 S100 calcium binding protein A4 [ Bos taurus (cattle) ]

**Official Symbol**

S100A4

**Synonyms**

AVPI1; arginine vasopressin induced 1; VIP32; VIT32; PP5395; arginine vasopressin-induced protein 1; AVP-induced protein 1; vasopressin-induced transcript

**Gene ID**

282343

**mRNA Refseq**

NM\_174595.2

**Protein Refseq**

NP\_777020.1

**UniProt ID**

P35466
