

## Recombinant Human OSBP protein, His & T7-tagged

Cat. No. OSBP-8006H    Lot. No. (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                 |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human OSBP aa. (Thr546~Phe807 (Accession # P22059)) fused with N-terminal His & T7 tag was produced in E. coli cells.                                                                                               |
| <b>Species</b>          | Human                                                                                                                                                                                                                           |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                          |
| <b>ProteinLength</b>    | Thr546~Phe807                                                                                                                                                                                                                   |
| <b>Description</b>      | Oxysterol binding protein is an intracellular protein that is believed to transport sterols from lysosomes to the nucleus where the sterol down-regulates the genes for the LDL receptor, HMG-CoA reductase, and HMG synthetase |
| <b>Form</b>             | Freeze-dried powder                                                                                                                                                                                                             |
| <b>Molecular Mass</b>   | Predicted Molecular Mass: 34.2kDa                                                                                                                                                                                               |
| <b>Endotoxin</b>        | <1.0EU per 1ug (determined by the LAL method)                                                                                                                                                                                   |
| <b>Purity</b>           | >90%                                                                                                                                                                                                                            |
| <b>Characteristic</b>   | The isoelectric point is 8.5.                                                                                                                                                                                                   |
| <b>Applications</b>     | SDS-PAGE; WB; ELISA; IP                                                                                                                                                                                                         |

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Stability</b>      | The thermal stability is described by the loss rate of the target protein. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. (Referring from China Biological Products Standard, which was calculated by the Arrhenius equation.) The loss of this protein is less than 5% within the expiration date under appropriate storage condition. |
| <b>Storage</b>        | Avoid repeated freeze/thaw cycles. Store at 2-8°C for one month. Aliquot and store at -80°C for 12 months.                                                                                                                                                                                                                                                                                                                                                                |
| <b>Storage Buffer</b> | Supplied as lyophilized form in 20mM Tris, 150mM NaCl, pH8.0, containing 1mM EDTA, 1mM DTT, 0.01% sarcosyl, 5% trehalose, and preservative.                                                                                                                                                                                                                                                                                                                               |
| <b>Reconstitution</b> | Reconstitute in sterile ddH <sub>2</sub> O.                                                                                                                                                                                                                                                                                                                                                                                                                               |

## GENE INFORMATION

|                        |                                                         |
|------------------------|---------------------------------------------------------|
| <b>Gene Name</b>       | OSBP oxysterol binding protein [ Homo sapiens (human) ] |
| <b>Official Symbol</b> | OSBP                                                    |
| <b>Synonyms</b>        | OSBP1; oxysterol-binding protein 1                      |
| <b>Gene ID</b>         | 5007                                                    |
| <b>mRNA Refseq</b>     | NM_002556.2                                             |
| <b>Protein Refseq</b>  | NP_002547.1                                             |
| <b>UniProt ID</b>      | P22059                                                  |
