

# Recombinant Rat Por protein, His & T7-tagged

**Cat. No.** Por-7967R    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Rat Por aa. (Gly210~Glu578 (Accession # P00388)) fused with N-terminal His & T7 tag was produced in E. coli cells.                                                 |
| <b>Species</b>          | Rat                                                                                                                                                                            |
| <b>Source</b>           | E.coli                                                                                                                                                                         |
| <b>ProteinLength</b>    | Gly210~Glu578                                                                                                                                                                  |
| <b>Description</b>      | Plays a role in electron transport.                                                                                                                                            |
| <b>Form</b>             | Freeze-dried powder                                                                                                                                                            |
| <b>Molecular Mass</b>   | 46kDa as determined by SDS-PAGE reducing conditions.                                                                                                                           |
| <b>Endotoxin</b>        | <1.0EU per 1ug (determined by the LAL method)                                                                                                                                  |
| <b>Purity</b>           | >95%                                                                                                                                                                           |
| <b>Characteristic</b>   | The isoelectric point is 5.5.                                                                                                                                                  |
| <b>Applications</b>     | SDS-PAGE; WB; ELISA; IP                                                                                                                                                        |
| <b>Stability</b>        | The thermal stability is described by the loss rate of the target protein. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein |

at 37°C for 48h, and no obvious degradation and precipitation were observed. (Referring from China Biological Products Standard, which was calculated by the Arrhenius equation.) The loss of this protein is less than 5% within the expiration date under appropriate storage condition.

|                       |                                                                                                            |
|-----------------------|------------------------------------------------------------------------------------------------------------|
| <b>Storage</b>        | Avoid repeated freeze/thaw cycles. Store at 2-8°C for one month. Aliquot and store at -80°C for 12 months. |
| <b>Storage Buffer</b> | Supplied as lyophilized form in PBS, pH7.4, containing 5% trehalose, 0.01% sarcosyl.                       |
| <b>Reconstitution</b> | Reconstitute in sterile PBS, pH7.2-pH7.4.                                                                  |

## GENE INFORMATION

|                        |                                                                                                                                                       |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>       | Por cytochrome p450 oxidoreductase [ <i>Rattus norvegicus</i> (Norway rat) ]                                                                          |
| <b>Official Symbol</b> | Por                                                                                                                                                   |
| <b>Synonyms</b>        | Por; cytochrome p450 oxidoreductase; CYPOR; NADPH--cytochrome P450 reductase; CPR; P450 (cytochrome) oxidoreductase; P450R; cytochrome P450 reductase |
| <b>Gene ID</b>         | 29441                                                                                                                                                 |
| <b>mRNA Refseq</b>     | NM_031576.1                                                                                                                                           |
