

# Recombinant Rat Myo1d protein, His-tagged

**Cat. No.** Myo1d-8040R    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Rat Myo1d aa. (Val512~Leu788 (Accession # Q63357)) fused with N-terminal His tag was produced in E. coli cells.                                                    |
| <b>Species</b>          | Rat                                                                                                                                                                            |
| <b>Source</b>           | E.coli                                                                                                                                                                         |
| <b>ProteinLength</b>    | Val512~Leu788                                                                                                                                                                  |
| <b>Description</b>      | An unconventional myosin that binds calmodulin.                                                                                                                                |
| <b>Form</b>             | Freeze-dried powder                                                                                                                                                            |
| <b>Molecular Mass</b>   | Predicted Molecular Mass: 34.4kDa                                                                                                                                              |
| <b>Endotoxin</b>        | <1.0EU per 1ug (determined by the LAL method)                                                                                                                                  |
| <b>Purity</b>           | >95%                                                                                                                                                                           |
| <b>Characteristic</b>   | The isoelectric point is 10.2.                                                                                                                                                 |
| <b>Applications</b>     | SDS-PAGE; WB; ELISA; IP                                                                                                                                                        |
| <b>Stability</b>        | The thermal stability is described by the loss rate of the target protein. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein |

at 37°C for 48h, and no obvious degradation and precipitation were observed. (Referring from China Biological Products Standard, which was calculated by the Arrhenius equation.) The loss of this protein is less than 5% within the expiration date under appropriate storage condition.

**Storage**

Avoid repeated freeze/thaw cycles. Store at 2-8°C for one month. Aliquot and store at -80°C for 12 months.

**Storage Buffer**

Supplied as lyophilized form in PBS, pH7.4, containing 5% sucrose, 0.01% sarcosyl.

**Reconstitution**

Reconstitute in sterile PBS, pH7.2-pH7.4.

## GENE INFORMATION

**Gene Name**

Myo1d myosin ID [ *Rattus norvegicus* (Norway rat) ]

**Official Symbol**

Myo1d

**Synonyms**

Myo1d; myosin ID; Myr2; Myr4; Myo1c; unconventional myosin-Id; Unconventional myosin from rat 4 for myosin I heavy chain; myosin 1C; myosin IC; myosin heavy chain myr 4; myosin-Id; myosin1C

**Gene ID**

25485

**mRNA Refseq**

NM\_012983.2

**Protein Refseq**

NP\_037115.2

**UniProt ID**

Q63357
