

Recombinant Human C4orf26 Protein, GST-Tagged

Cat. No. C4orf26-0061H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human C4orf26 full-length ORF (BAD18758.1, 1 a.a. - 130 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	Dental enamel forms the outer cap of teeth and is the hardest substance found in vertebrates. This gene is thought to encode an extracellular matrix acidic phosphoprotein that has a function in enamel mineralization during amelogenesis. Mutations in this gene are associated with recessive hypomineralized amelogenesis imperfecta. [provided by RefSeq, Oct 2012]
