

# Recombinant Human ARRDC1-AS1 Protein, GST-Tagged

**Cat. No.** ARRDC1-AS1-0198H    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                               |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Human ARRDC1-AS1 full-length ORF (NP_116326.2, 1 a.a. - 176 a.a.) recombinant protein with GST-tag at N-terminal.                                                                             |
| <b>Species</b>          | Human                                                                                                                                                                                         |
| <b>Source</b>           | Wheat Germ                                                                                                                                                                                    |
| <b>ProteinLength</b>    | 1-176 a.a.                                                                                                                                                                                    |
| <b>Description</b>      | This transcribed locus is thought to be non-coding. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jun 2014]                                              |
| <b>Molecular Mass</b>   | 44.4 kDa                                                                                                                                                                                      |
| <b>AA Sequence</b>      | MEFHYVAQADLELLTSSNPPASASQSTGITGGSHRARPGPVHFIDKVTDKPSHSHPF<br>ALKENWNLNPEPSSPPSPLFLEAPSRQASQHHGASPGAGTSAGCPFEKCCSTEPCL<br>LSGLGDVGRGEAASLRARPGSGASRGQGPGSRVSCRRDLGKPLHAPAGFSAGEV<br>HTTPLGNLGA |
| <b>Applications</b>     | Enzyme-linked Immunoabsorbent Assay<br>Western Blot (Recombinant protein)<br>Antibody Production<br>Protein Array                                                                             |
| <b>Notes</b>            | Best use within three months from the date of receipt of this protein.                                                                                                                        |

|                         |                                                                                                                                                 |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Storage</b>          | Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.                                                                        |
| <b>Storage Buffer</b>   | 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.                                                                        |
| <b>GENE INFORMATION</b> |                                                                                                                                                 |
| <b>Gene Name</b>        | ARRDC1-AS1 ARRDC1 antisense RNA 1 [ Homo sapiens (human) ]                                                                                      |
| <b>Official Symbol</b>  | ARRDC1-AS1                                                                                                                                      |
| <b>Synonyms</b>         | ARRDC1-AS1; ARRDC1 antisense RNA 1; C9orf37; ARRDC1 Antisense RNA 1; Chromosome 9 Open Reading Frame 37; ARRDC1 Antisense Gene Protein 1; AD038 |
| <b>Gene ID</b>          | 85026                                                                                                                                           |
| <b>mRNA Refseq</b>      | NM_032937                                                                                                                                       |
| <b>Protein Refseq</b>   | NP_116326                                                                                                                                       |
| <b>UniProt ID</b>       | Q9H2J1                                                                                                                                          |
