| <b>Description</b>      | CCDC62 (Coiled-Coil Domain Containing 62) is a Protein Coding gene. GO annotations related to this gene include ligand-dependent nuclear receptor transcription coactivator activity and estrogen receptor binding.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>Molecular Mass</b>   | 103.9 kDa                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

TSKLQRLLAESRQMVTDLLESTLLPISHENLTGSATNISHLCGRQKADTNTE

**Applications**

Enzyme-linked Immunoabsorbent Assay  
Western Blot (Recombinant protein)  
Antibody Production  
Protein Array

**Storage**

Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.

**Storage Buffer**

50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

## GENE INFORMATION

**Gene Name**

CCDC62 coiled-coil domain containing 62 [ Homo sapiens ]

**Official Symbol**

CCDC62

**Synonyms**

CCDC62; coiled-coil domain containing 62; coiled-coil domain-containing protein 62; cancer/testis antigen 109; CT109; ERAP75; FLJ40344; TSP NY; aaa-protein; testis-specific protein TSP-NY; coiled-coil domain-containing protein 60; TSP-NY; FLJ25432;

**Gene ID**

84660

**mRNA Refseq**

NM\_201435

**Protein Refseq**

NP\_958843

**MIM**

613481

**UniProt ID**

Q6P9F0
