

Recombinant Human V-Yes-1 Yamaguchi Sarcoma Viral Related Oncogene Homolog, His-tagged

Cat. No. LYN-1254H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinanthuman full length LYN with C-terminal His tag. LYN is a SRC family kinaseexpressed predominantly in hematopoietic cells.
Species	Human
Source	Insect Cells
Description	LYN is a member ofthe Src family of protein tyrosine kinases, which is mainly expressed inhematopoietic cells, in neural tissues liver, and adipose tissue. In varioushematopoietic cells, LYN has emerged as a key enzyme involved inthe regulation of cell activation. In these cells, a small amount of LYN isassociated with cell surface receptor proteins, including the B cell antigenreceptor (BCR), CD40, or CD19.
